

## **Clinical or Community Partnerships**

### **Trinity Valley Community College ADN**

*East Texas Medical Center (ETMC), Athens*

*Presbyterian Hospital of Kaufman*

The Trinity Valley Community College (TVCC) building is owned by Presbyterian Hospital of Kaufman. The school is working with the hospital to obtain access to more land so that TVCC can expand and increase enrollment. This is ongoing and is still in the initial stages so there are no specifics yet regarding dates, costs, etc.

**Approximate cost of implementing and maintaining partnership:** unknown

**Grant monies used:** n/a

**Expected benefits from partnership:** none listed

**Challenges from partnership:** none listed

**Phone:** (972)932-4309

**E-mail:** reid@tvcc.edu

**Name of contact person:** same as above

### **2009 Update:**

TVCC and ETMC Athens have partnered so that the distance education students, who attend lectures via video conference from the main campus at Athens can attend skills lab in Athens and do not have to travel to Kaufman. This has resulted in an increased enrollment in the nursing programs.

## East Texas Consortium

The ANET project was funded by the THECB under their innovation grant program. The purpose of the grant was to identify students at risk of failing out of the nursing programs at SFASU, Angelina College and Panola College. Those students who were identified as at-risk were provided a modified curriculum which spaced out courses in the first semester, thereby decreasing the study load for those at-risk students. The courses were provided in a web-based format which provided students with the opportunity to review content as often as necessary in order to master the material. Tools to measure all variables were developed and administered to all incoming students. The project studied overall retention rates and retention at two critical points with the highest potential for failure in the nursing curriculum - the first semester and the semester including medical-surgical nursing. Two on-line entry courses, Pharmacology and Health Assessment, and one recovery course, Medical-Surgical Nursing, were developed and used in summer 2004 and 2005. The partner institutions shared faculty, curriculum and facilities in all three courses. A statistician compiled and analyzed the student data. Seven research questions evaluated the variables linked to success in all students and intervention students, identified differences in ADN and BSN students, and differences in retention rates for at-risk vs. control group students, and by ADN and BSN groups. Four hospitals provided in-kind funding for the project.

**Approximate cost of implementing and maintaining partnership:** partnerships maintained by relationships with agencies; cost unknown

**Grant monies used:** yes, THECB

**Expected benefits from partnership:**

As a result of this partnership, Tenet Medical Center in Nacogdoches donated space, remodeling costs, and a partial FTE for a shared clinical laboratory facility for Angelina College, Panola College and SFASU School of Nursing. To date, the partnership is continuing to work together as the East Texas Nursing Education Consortium (ETNEC) and is actively seeking grant opportunities for other innovative projects.

**Challenges from partnership:**

- overcoming differences in philosophies between ADN and BSN programs and differences in curricula. These barriers were overcome by developing, over time, trusting relationships between the partners

## North Texas Consortium

The North Texas Consortium of Schools, led by Dr. Poster at UTA, has been meeting several years regarding pertinent issues. The group worked with the DFW Hospital Council and AHEC developed the community standard for drug testing, background checks and a universal hospital orientation. Each school worked on developing projects for competency testing which will be shared with all Texas schools. TNA is working with the group in order to distribute the information. The Consortium has held three summer institutes for faculty development.

**Approximate cost of implementing and maintaining partnership:** variable

**Grant monies used:** none

**Expected benefits from partnership:**

- schools have contributed for the summer institutes and for the development of the competency projects.

**Challenges from partnership:**

- none identified
